Redis

Celery

Docker

AWS

pytest

REST APIs

SQLAlchemy

Education

B.S. Computer Engineering,
Tulane University

Summary

Backend engineer focused on Python APIs, PostgreSQL, and reliable background processing.

Experience

Backend Engineer, Tidewater Payments — Jan 2021 – Present

• Designed REST APIs in FastAPI serving 3M requests per day.

• Led performance tuning of PostgreSQL queries and indexes, dropping p95 latency from 900ms to 120ms.

• Moved nightly settlement jobs to Celery workers backed by Redis.

• Containerized services with Docker and deployed them on AWS ECS.

• Handled card data under PCI DSS controls.

Software Developer, Gulf Coast Insurance Group — Jul 2018 – Dec 2020

• Maintained a Django claims portal and its SQLAlchemy reporting scripts.

• Wrote pytest suites that raised coverage from 40% to 85%.
